

iTalk

Digital voice address system

iTalk is a digital voice address system that delivers recorded audio messages about the public transport network to people living with increased accessibility needs.

The technology can operate as a module, stand-alone system or be fully integrated with your existing communication infrastructure.

Clear communication

iTalk delivers clear, concise and coherent information about public transport services, such as:

- Emergency announcements
- Arrival and departure information
- Courtesy announcements

What's available?

- Wireless communication to multiple networks – GPRS/3G/WiFi/WLAN
- Complement audio with multi-media interfaces (i.e. advertising)
- Internal & external speakers
- Self-adjusting volume to ambient noise levels, with manual override

Features

- Pre-recorded library (WAV or MP3 format)
- Location triggered content, with manual override
- Stand alone add-on product or fully integrated with existing system
- Compatible with proprietary and/or RNIB products
- Content can be downloaded and uploaded

About REACT Technologies

REACT Technologies is the only European licensed supplier and manufacturer of RNIB React Enabled accessibility technology in the UK, including the imedia Real Time Information display.

You can trust us to bring innovation and credibility to you or your clients' projects, while positioning you as a trusted leader in improving public transport accessibility and encouraging independent living.
